

This is a monobloc head designed for the seasoned professional and the emerging photographer.

The 150W-Flash® uses high-quality German flash tubes. The modeling light can be set at full brightness or proportional to the flash tube light output.

Recharges quickly. Audible and visible light full-charge indicators.

This strobe can be used with a reflector, umbrella, or soft box. The included Tilt Swivel Mount is secure and allows for tilt range of 170 degrees. The Tilt Swivel can be repositioned on the StarFlash to compensate for weight imbalance when using larger soft boxes.

The Flash® uses high-quality German flash tubes. The modeling light can be set at full brightness or proportional to the flash tube light output.
